

Working poverty rate by neighbourhood, Metro Vancouver, 2006.

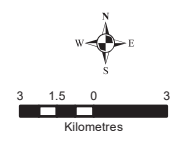

Percentage by Census Tracts

- 0% to 5%
- 5% to 10%
- 10% to 15%
- 15% to 20%

Note: Data are mapped to 2006 boundaries. Working age population defined as individuals who are between 18 and 64, non-students and living on their own. Working poverty refers to persons having earnings no less than \$3,000. Poor status refers to individuals with census family income below the Low Income Measure (50% of adjusted after-tax median income of all Canadians) determined from taxfiler data (T1FF).
